All in one Platform

Bluewater is the platform that unites your mobility and telecom expense management. Bring Administration, IT, finance, HR and Azentro together in one, central platform.

This is what you'll say goodbye to:

- Multiple spreadsheets, emails and follow-up phone calls
- Laborious manual workflows and processes
- Wastage from poor visibility over telecom expenses and assets

Full mobile lifecycle Management

Bluewater provides a full suite of services, including the ability to:

- Order new mobile handsets and services at the click of a button through your organisation specific catalogue.
- Quickly assign services and devices to employees and automate cost allocation to cost centres.
- Manage your mobile fleet with SIM reallocations, replacements and much more.
- Drill down to identify bill variances - and their causes - in seconds.
- Perform an instant Health Check to discover potential cost leaks.
- Extract GL files for your finance system.
- Easily manage your basic MDM functions.
- Get visibility, make informed decisions and delegate responsibility with dashboards and reports that take only seconds to generate and can be automatically distributed.

What our clients say

"In our historical processes there was a lot of manual work, which left the opportunity for mistakes. Bluewater has massively improved the day to day tasks required to manage our fleet and efficiency in managing cost. Bluewater also helps streamline and improve my interactions with Telstra."

**Lloyd Jones, General Manager Information Technology,
Hi-Trans Express**
